Event Overview & Learning Outcome Statement

Please join us at the NNEPQIN Fall Meeting, a **free** one-day virtual event. This program is designed to support implementation of best practice guidelines related to perinatal safety, trauma informed care, telemedicine, OB emergencies and neonatal resuscitation. We will also address disparities in the care of the pregnant woman and her newborn. At the conclusion of this activity, the learner will be able to discuss at least three strategies to improve quality and reduce inequities in perinatal care, while incorporating new guidelines to optimize maternal and neonatal outcomes.
