

NNEPQIN Fall Conference | November 16-17, 2023

Adapting to the New Normal and Designing Strategies to Improve Perinatal Outcomes in Northern New England Omni Mount Washington Resort, Bretton Woods NH

Target Audience

Obstetricians, Midwives, Pediatricians, Family Practitioners Perinatal Nurses, Nurse Practitioners, Risk Managers and Administrators

Event Overview

Join your colleagues in this spectacular setting to address the challenging obstetrical and neonatal issues that face the entire multidisciplinary team. In addition to delving into hot topics in perinatal care, this year we strive to incorporate patient perspectives in order to best tackle these challenges and improve outcomes. We also plan to explore emerging opportunities to improve outcomes which include Doula support throughout the perinatal period and the importance of integrating recommendations from Maternal Mortality reviews into clinical practice. And it would not be a NNEPQIN Conference without as much simulation as possible! Bring your team of obstetrical and neonatal colleagues to design strategies that will work in your clinical setting.
